No it is not a waste shipment, it is the pure product purchased for use. I don't have the facility information right now, but have a request to Freedom for that information. Once I get the information I will send it to you.

Just to clarify: this isn't a waste shipment, correct? Also, because of the sensitive nature of the MCHM compound, please pass along the receiving facilities information including location.

Thanks.

Subject: Just an FYI: About Freedom Industries

Hi Art,

I just wanted to let you know that Freedom Industries just sold/transported yesterday (2/17/14) about 5,000 gallons of MCHM/PPH to a facility in Alabama. I don't know the specific facility. I don't anticipate there being any issues, but I know when it made it to the newspaper that it was transported into Pennsylvania for a facility to use it caused a lot of questions from the PA elected officials and locals about whether they were equipped if a release were to occur. So I just wanted to let you know.

Thanks,

Melissa
